- Modern Workplace

PRODUCTS

- Microsoft Bit Locker
- Microsoft Bit Locker Administration & Management
- Microsoft System Center
- Windows 7 & 10

NUMBER OF USERS

- 20,000 Employees

OVERVIEW

Client is a leading retailer and online provider of sports and outdoors equipment. With over 200+ locations, they carry a wide range of quality sports and outdoors products including hunting, fishing and camping equipment, outdoor furniture, along with sports and recreation products.

PROBLEM

Client needed to modernize their Configuration Management Technology stack to better support Workstation and Server patching security as well as increasing readiness and preparations for Windows 10 adoption.

SOLUTION

To provide a more robust Security Patching solution, while improving support for Windows 10 and enhance Windows Server efficiencies for a lower Total Cost of Ownership (TCO), Client engaged FyrSoft to replace existing LANDESK with a full production deployment of Microsoft System Center Configuration Manager (SCCM). FyrSoft conducted the engagement as follows in a series of phases to properly design and build a solution that addresses all the customer's regulatory and business requirements.

- Planning & Design of the System Center Configuration Manager (SCCM) Core Infrastructure
- Implementation of the SCCM Core Infrastructure as designed and documented
- Implementation of the SCCM Components and Features as designed and designated in the Project Technology Feature Mapping scope section
- Operating System Deployment
- Software Metering
- Security Patching
- *Internet-Based Client Management (requires PKI)
- Software Distribution
- Software Packaging
- Managed Settings
- Asset Intelligence
- Production Rollout of up to 90% of the ~6,250 Agents and 90% coverage of the 200 physical sites requiring SCCM infrastructure

FyrSoft also provided a complete Administrator and Operator handbook for all solutions design and implemented allowing the Client to have a complete turnkey solution.
